

Finance AI Assistant — User-Facing Feature List

Version: 1.0 MVP + V1+ | Last Updated: 2025-10-21 23:30:31

Must-have (MVP)

Conversational banking

- Natural chat to ask for anything (“balance?”, “last 5 transactions”, “send ₹500 to Anjali”)
- Smart follow-ups if details are missing (which account? how much? when?)
- Quick-action chips (Balance • Recent txns • Spend summary • Set budget)

Accounts & balances

- View all accounts with masked numbers and real-time balances
- Account snapshots (available balance, holds, recent activity)

Transactions & statements

- Transaction history with filters (date, amount, merchant, category)
- Search by merchant/keyword
- Download monthly statement (PDF) or CSV export of selected range

Payments & transfers (mocked but realistic)

- Transfer between own accounts / saved contacts
- Pay billers (mock catalog) and add a note
- Confirmation step with human-readable summary before execution
- Scheduled transfers (once/later/date)

Cards

- Freeze / unfreeze card
- View masked card details and status
- Report lost/stolen (creates support ticket)

Personal Finance Management (PFM)

- Auto-categorized spend view (month/30-day rolling)
- Top merchants, top categories, largest expense
- Budget per category: create, view, edit; utilization %
- Goals: create (target amount/date), track progress, nudges

Alerts & notifications (in-app)

- Low balance, upcoming bill due, unusual spend/merchant spike
- Alert inbox in the assistant + “you have X alerts” pill in chat
- Mark-as-read and manage alert preferences

Product guidance (transparent & optional)

- Personalized offers (e.g., travel card, high-yield savings) with “Why am I seeing this?”
- Simple pre-qualification walkthrough (mock result: likely eligible / needs docs)

Human handoff & support

- “Talk to a human” escalation with full chat transcript
- View ticket status and last update
- Short FAQ answers on common topics (limits, timings, fees)

Privacy, security & control (user-visible)

- Action confirmations for risky operations (transfers, bill pay)
- Redaction of sensitive info in chat (masked account/card)
- Download my data (chat transcript, statements) as ZIP
- Request data deletion (mock flow + ticket)

Settings & personalization

- Notification preferences (which alerts, frequency)
- Rename accounts, override transaction categories
- Default account for quick actions
- Language preference (e.g., English + one local language)
- Light/Dark theme; large text mode

Accessibility

- Full keyboard navigation + screen-reader support
 - High-contrast mode
 - Voice input (optional toggle) and transcript display
-

Nice-to-have (V1+)

Deeper insights

- Subscription detection & management (identify recurring charges; cancel guidance)
- Cashflow forecast (next 30/90 days) based on recurring inflows/outflows
- “What changed this month?” anomaly highlights
- Merchant insights (maps, typical spend windows)

Advanced payments

- New payee onboarding with soft verification flow
- Split a transaction (budgeting) or split a bill with contacts (mock)
- Saved templates (“rent ₹8,000 every 5th”)

Card controls

- Set spend limits (daily/online/international) and temporary increases
- Travel notice (dates, countries)

SS

Documents & tax

- Annual spend report by category
- Tax-ready exports (CSV by FY, category summaries)
